SKILLS

- Python, SQL, R, JavaScript, TypeScript, C#
- Data Pipelines & ETL, Data Quality & Validation, Dimensional Modelling, Machine Learning, Generative AI & LLMs, Forecasting, Statistical Analysis, Predictive Modeling
- pandas, NumPy, scikit-learn, PySpark, Spark SQL, Parquet, Kedro, MLflow, Docker, FastAPI, Streamlit, pytest, LangChain, Azure OpenAI, GitHub Actions, PyTorch, MongoDB, Power BI
- English(fluent - MSc taught in English), Ukrainian(native), Russian(native), Portuguese(B1), Italian(A2)

EXPERIENCE

Ophis Research – Machine Learning Engineer | FinTech ML Developer *Nov 2025 - Present*

- Built a swing-point classifier on 4 years of ETH 15-minute bars, fractal-labelled with nine online-safe features and validation-tuned thresholds (0.75/0.82 by max-F1)
- Built a Monte Carlo pre-trade engine (GBM and bootstrap paths) scoring VaR, CVaR and Kelly
- Replayed every simulated path under the live exit rules, keeping sim and execution in step

FreedomCode - Technical Program Associate, CTO & CIO office **|***Contract***|** *Jan 2024 – May 2024*

- Worked directly with the CTO and CIO to map and streamline delivery workflows across cross-functional web and mobile teams, cutting project timelines ~20%
- Designed and implemented a structured data pipeline that replaced ad-hoc status reporting, halving redundant communication and freeing engineers for technical work
- Analysed product and Google Analytics data to locate UX and performance bottlenecks, presented findings to technical and non-technical stakeholders, and ran QA test protocols to validate the fixes

BeeSurfing – Information Systems Developer *Jan 2024 – Jun 2024*

- Built a cross-platform mobile application in Flutter and engineered a Firestore-based backend to support real-time booking, school availability, and group surf sessions

PROJECTS

F1 Data Warehouse & ML Platform – PySpark *GitHub*

- Built a medallion ETL pipeline over 74 years of F1 data across 14 tables, with explicit schemas, partitioned Parquet and referential-integrity checks
- Modelled a star-schema gold layer; Spark MLlib scored ROC-AUC 0.878 and cut RMSE 73%

COVID-19 Severity Prediction – End-to-End MLOps Pipeline *GitHub*

- *Co-built a ten-stage Kedro pipeline from ingestion and data-quality checks to serving*
- *Containerised serving with FastAPI and MLflow, plus PSI/KS drift and API-parity tests*

PitWall – Lead Discovery & Scoring Pipeline *(walkthrough on request)*

- *Built a seven-stage resumable pipeline over SQLite with cached multi-provider fallback*
- *Chose recall over precision on a 60-case labelled set (0.62→0.94 for 0.67→0.61) because a missed lead costs more than a wasted review; 260 tests, 90% coverage*

EDUCATION

Nova University of Lisbon | Information Management School

Master's Degree in Data Science and Advanced Analytics *Sep 2025 - expected Jul 2027*

- *Concentrations: Big Data Analytics; Machine Learning; Deep Learning; Optimization*
- *Relevant Coursework: Data Mining; Statistics for Data Science; Programming for Data Science; Text Mining; Storing & Retrieving Data*

Bachelor's Degree in Information Systems and Technologies *Sep 2022 - Jan 2025*

- *Concentrations*: Data Engineering; Systems Analysis; App and Web Development
- *Relevant Coursework*: Data Integration and Management; Database Systems; Big Data Analytics; Information Systems Design; Programming Languages; Business Process Modeling

University of Milano-Bicocca (Erasmus Exchange Program) *Jan 2025 - Jul 2025*

- *Courseworks in Deep Learning and Data Science*

Dnipro Scientific Lyceum of Information Technologies *Sep 2019 - Jun 2022*

- Graduated with Distinction (Top 5% of class) from a top-3 ranked academic lyceum in Ukraine
